As a highly motivated and self-taught full-stack developer, I am seeking a challenging role that allows me to apply my skills and expertise in developing innovative web applications. My passion for coding and learning new technologies has enabled me to work on diverse projects, from building responsive front-end interfaces to developing robust back-end functionalities. I am eager to work with a team of talented professionals who share the same drive and passion for excellence.

Experience

Software Engineer Aug 2023 - Present

LabGlo, Technopark, Trivandrum

- Developing and maintaining web applications from end to end, including front-end user interfaces, back-end servers, and databases.
- Writing clean, efficient, and maintainable code using best practices and industry standards.
- Creating and managing APIs and web services to support both internal and external applications.
- Staying up to date with the latest technologies, tools, and trends in full stack development to continuously improve the company's web applications.
- Developing and maintaining web applications from end to end, including front-end user interfaces, back-end servers, and databases.

Full Stack Developer Feb 2022 - Jul 2023
